

Community Liaison Committee

Our goal is to provide comprehensive, high-valued-added solutions that balance growth and environmental protection, solutions that manage water sustainability, turn waste into a resource, and develop cleaner, more efficient energy systems.

We are committed to consulting with relevant stakeholders, taking into account local environmental conditions and working with local communities to achieve shared and lasting outcomes.

EarthPower's Community Liaison Committee (CLC) provides EarthPower with the opportunity to consult and engage with community members with an interest in the facility operations.

EarthPower holds regular CLC meetings at its premises to address the following:

- Reviewing the performance of the EarthPower facility
- Providing a forum for the community to raise questions and concerns particularly about the facility's impacts on the surrounding community
- Seeking mutually satisfactory solutions on concerns about environmental impact.
